Education

Sri Krishna College of Technology 2024 – 2028
Bachelor of Engineering in Computer Science and Engineering

Projects

Telegram Bot for YouTube Video & Audio Downloading

- Built a Telegram bot to download YouTube videos and audio from user-provided URLs using `yt-dlp`.
- Supported multiple formats and resolutions with structured error handling for reliability.
- Improved performance using caching and organized file handling for faster delivery.

Prepared with Hygiene — AI-Powered Kitchen Certification System

- Architected a multi-agent AI system using LLMs (Gemini Flash & Pro) for automated kitchen hygiene monitoring with transparent, verifiable certification for restaurants.
- Implemented three-tier debate mechanism (Vision Inspector → Policy Auditor → Final Judge) with Telegram Bot integration for real-time alerts and timestamped evidence logs.
- Built video processing pipeline (OpenCV/FFmpeg) with intelligent frame extraction and React frontend displaying AI-verified badges for food delivery platforms (Swiggy, Zomato).

Movie Search Application

- Built a movie search application enabling users to explore movies via keyword-based queries.
- Integrated external APIs to fetch movie metadata, ratings, and posters dynamically.
- Designed a responsive UI with efficient filtering and search result handling.

Event Management System (Django + Next.js)

- Built a full-stack System using Django REST Framework, PostgreSQL, and Next.js.
- Designed RESTful CRUD APIs with proper validation and structured error handling.
- Implemented a responsive frontend using Axios for API communication nad Tailwind CSS for styling.
- Enabled CORS for seamless frontend-backend integration.

Technical Skills

Languages: C, C++, Python, Java, JavaScript, TypeScript

Web: HTML, CSS, Bootstrap, React, React Router, NextJS, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, Spring Data JPA, Django

Databases: MySQL, MongoDB, PostgreSQL

Core: Data Structures, Algorithms, OOP

Tools: Linux, Git, GitHub, GitLab, Docker

AI Tools: GitHub Copilot, Claude, Cursor, MidJourney, ElevenLabs

Cloud Services: Vercel, Railway, Render

Core Competencies

AI/ML: Multi-Agent Systems, LLM Orchestration, Prompt Engineering, Computer Vision, Object Detection, Video Processing

Full-Stack: REST APIs, CRUD Operations, Full-Stack Development, Frontend-Backend Integration, Responsive Design

Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, System Design, Automated Testing, Git Version Control, Docker Containerization
