Education

Sri Krishna College of Technology 2024 – 2028
Bachelor of Engineering in Computer Science and Engineering

Projects

Telegram Bot for YouTube Video & Audio Downloading *Python, python-telegram-bot, yt-dlp*

- Built a Telegram bot letting users download YouTube videos/audio in multiple formats and resolutions from a URL.
- Used `async`/`await` handlers (python-telegram-bot v20+) for per-user, concurrent session handling.
- Integrated yt-dlp for dynamic resolution/format selection, splitting large files into parts for upload.

Prepared with Hygiene — AI-Powered Kitchen Certification System *Python, OpenCV/FFmpeg, Groq*

- Architected a multi-agent AI system for automated, video-based kitchen hygiene monitoring for restaurants.
- Built a two-agent pipeline (Inspector → Unified Judge) via Groq API (Llama-4-Scout-17B, GPT-OSS-20B), with Telegram alerts.
- Built an OpenCV/FFmpeg extraction pipeline and a React frontend showing AI-verified badges, logged to PostgreSQL/JSON.

Movie Search Application *React, JavaScript, TMDB API*

- Built a React movie search app to explore movies via keyword queries, to learn React and REST API integration.
- Used React Context for state management and the TMDB API for metadata, ratings, and posters, securing keys via Vite environment variables.
- Averaged 228ms for the home page's movie data fetch.

Event Management System *Next.js, React, Tailwind CSS, Django REST Framework, PostgreSQL*

- Built a full-stack event management system for users to create, manage, and search their own events.
- Implemented DRF Token Authentication with user-scoped, validated CRUD APIs restricting access per user.
- Built a responsive Next.js App Router frontend (Tailwind CSS, Axios) with CORS-enabled integration.

Technical Skills

Languages: C, C++, Python, Java, JavaScript, TypeScript

Web: HTML, CSS, Bootstrap, React, React Router, NextJS, Tailwind CSS

Backend: Spring Boot, Spring Data JPA, Django

Databases: MySQL, MongoDB, PostgreSQL

Core: Data Structures, Algorithms, OOP

Tools: Linux, Git, GitHub, GitLab, Docker

AI Tools: GitHub Copilot, Claude, Cursor, MidJourney, ElevenLabs

Cloud Services: Vercel, Railway, Render

Extracurricular

Certifications: Frontend Developer (React) – HackerRank | Selenium 101: Web Automation – LambdaTest | AWS Networking Basics – AWS Training & Certification | AI Agents with MongoDB – MongoDB Academy | RAG with MongoDB – MongoDB Academy | Vector Search Fundamentals – MongoDB Academy | Python for Data Science (Elite) – NPTEL, IIT Madras
